## EXPERIENCE

---

### iVue | [Website](#)

Jan 2023 - Present

Senior Software Developer

Atlanta, GA

- Developed a full-stack single-page application called Worlds iVue, a geospatial platform that uses browser and web services to connect and operate advanced drones.
- Led the development of iVue's company websites, overseeing and personally contributing to its overall design and marketability to potential consumers.
- Improved Website Performance by lowering overall latency by 75% and integrating third-party APIs for contact pages.
- Implemented wide-scale email services for all of the company with [Amazon WorkMail](#), enhancing productivity levels for sales, software development, and engineering personnel.
- Integrated third-party services for Worlds iVue to enhance its UI/UX and functionality with user authentication, low latency, and ease of communication.

### Sublo | [Website](#)

July 2024 - Dec 2024

Intern Software Developer

Atlanta, GA

- Collaborated with other software developers to create a mobile application with [React Native](#) that simplifies subleasing for college students.
- Integrated [Amazon Cognito](#) into their application to enhance its user authentication system.

## PROJECTS

---

### Pizza Ordering System | [Website](#)

Nov 2024

Frontend Development

Marietta, GA

- Developed and deployed a mock pizza ordering system that would be used by a small pizza shop to manage its order and delivery system.

### Portfolio Website | [Website](#) | [GitHub](#)

August 2024 - Present

Full-Stack Development

Atlanta, GA

- Embedded [AWS](#) and [Cesium](#) in my website to establish a platform where visitors can easily communicate with me and explore my professional career.
