SUMMARY

I'm a software developer experienced in web and mobile application development. I work across the stack, combining frontend design, backend systems, and third-party cloud services to build solutions that are intuitive, reliable and help solve everyday problems. I also lead teams and mentor young, emerging developers, fostering growth and collaboration. For more information about me, check out my Personal Website at www.mohit-jain.com.

EXPERIENCE

iVue

Lead Software Developer

Jan 2023 - Present

Cumming, GA

- Defined company standards for web application development by mandating professional coding best practices, writing technical documentation, and creating training programs to help new developers build essential frontend skills at iVue.
- Developed a full-stack single-page application called [Worlds iVue](#), a geospatial platform that is capable of connecting to and operating advanced drones and other devices. It utilizes Amazon Web Services such as [Amazon Cognito](#) for its user authentication services and Web APIs such as the [Web Gamepad API](#) to enable gamepad compatibility so users can operate their drone directly with a gaming controller.
- Led the development of iVue's company websites, overseeing and personally contributing to its overall design, and improved website performance by lowering overall latency by 75% and improving search engine optimization with Google Analytics.
- Built Arduino systems for motor control and data communication and enabled reliable integration with drones and ground stations using the [MAVLink Protocol](#).
- Mentored multiple interns in front-end development by offering guidance and hands-on assistance on modern web development frameworks, responsive UI/UX design, and coding best practices.
- Implemented company-wide email services with [Amazon WorkMail](#), improving communication and productivity across sales, software development, and engineering teams.

Sublo

Intern Mobile Application Developer

July 2024 - Dec 2024

Atlanta, GA

- Collaborated with other software developers to create a mobile application with [React Native](#) by taking charge as the primary mobile application developer, integrating [Amazon Cognito](#) into their application to create its user authentication system, and utilizing mobile-specific APIs to enhance the app's capabilities.

PROJECTS

Mapping Neurodivergence

Full-Stack Development

March 2025

Marietta, GA

- Developed a web application that helps neurodivergent users easily connect with one another for the Spring 2025 Hackathon for Social Good at Kennesaw State University.
- Took charge of frontend development, software testing, and API development with my team.

EDUCATION

Kennesaw State University

Bachelor Degree in Computer Science

Aug 2023 - Expected May 2027

Kennesaw, GA

- **GPA:** 3.7
- **Coursework:** Programming Problem Solving, Database Systems, Software Engineering, Discrete Mathematics, Professional Practices and Ethics, Physics, Data Structures, Probability and Data Analysis, Operating Systems, Linear Algebra, Artificial Intelligence

SKILLS

- **Languages And Frameworks:** Java, JavaScript, Node.js, HTML, CSS, [Vue.js](#), Nuxt, React, React Native, Angular, Vite, Vitest, Tauri, TypeScript, NodeJS, Python, [GoLang](#), SQL, [R](#)
- **Tools And Platforms:** Amazon Web Services, Git, GitHub, GitLab, NPM, Yarn, MAVLink Protocol, CesiumJS, Arduino
