EXPERIENCE

iVue | [Website](#)

Jan 2023 - Present

Lead Software Developer

Atlanta, GA

- Developed a full-stack single-page application called [Worlds iVue](#), a geospatial platform that uses browser and web services to connect and operate advanced drones and other devices.
- Led the development of iVue's company websites, overseeing and personally contributing to its overall design and marketability to potential consumers.
- Improved Website Performance by lowering overall latency by 75%, integrating third-party APIs for contact pages, and improving search engine optimization with Google Analytics.
- Implemented company-wide email services with [Amazon WorkMail](#), improving communication and productivity across sales, software development, and engineering teams.
- Mentored multiple interns in front-end development, offering guidance and hands-on assistance on modern web development frameworks, responsive UI/UX design, and coding best practices.
- Integrated third-party services for Worlds iVue to enhance its UI/UX and functionality with user authentication, low latency, and ease of communication.

Sublo | [Website](#)

July 2024 - Dec 2024

Intern Software Developer

Atlanta, GA

- Collaborated with other software developers to create a mobile application with [React Native](#) that simplifies subleasing for college students.
- Integrated [Amazon Cognito](#) into their application to create its user authentication system.

PROJECTS

Mapping Neurodivergence | [Website](#) | [GitHub](#)

March 2025

Full-Stack Development

Marietta, GA

- Developed a web application that helps neurodivergent users easily connect with one another.
- This was a project for the Spring 2025 Hackathon for Social Good at Kennesaw State University.

Portfolio Website | [Website](#) | [GitHub](#)

August 2024 - Present
